A Room with a Rich History

The origins of the living room can be traced back to ancient times. In Roman homes, the atrium served as a central gathering space, where families ate, entertained guests, and conducted business. During the

Middle Ages, the great hall of castles and manor houses fulfilled a similar function, serving as a communal area for both lords and servants.

As societies evolved, so too did the concept of the living room. In the 18th century, the rise of the bourgeoisie led to the emergence of more elaborate and specialized living spaces. Drawing rooms and salons became popular, serving as places for social gatherings and intellectual discussions.
