Reading is a fundamental skill that is essential for success in school and beyond. However, many students struggle with reading, and it is important to have effective programs in place to help them improve their reading skills.

Surveys are a valuable tool for evaluating reading programs. They can provide information about the program's effectiveness, the students' satisfaction with the program, and the program's impact on student learning.

However, designing and implementing effective surveys can be challenging. That's where this book comes in.

What's Inside This Book?

This book is a comprehensive guide to designing and implementing effective surveys for evaluating reading programs. It provides step-by-step instructions, examples, and case studies to help researchers and practitioners design surveys that collect valid and reliable data.

The book is divided into three parts:

- **Part I: to Survey Design**
- **Part II: Designing Surveys for Evaluating Reading Programs**
- **Part III: Implementing Surveys and Analyzing Data**

Part I provides an overview of survey design, including the different types of surveys, the steps involved in designing a survey, and the importance of sampling.

Part II focuses on designing surveys for evaluating reading programs. It covers topics such as selecting the appropriate survey questions, developing a survey instrument, and pretesting the survey.

Part III discusses implementing surveys and analyzing data. It covers topics such as administering the survey, collecting data, and analyzing the data.

Who Should Read This Book?

This book is intended for researchers and practitioners who are involved in evaluating reading programs. It is also a valuable resource for students who are learning about survey design and evaluation.
