The Documentation for Rehabilitation book is the most authoritative and comprehensive resource on rehabilitation medicine, providing evidence-based guidance on the assessment, diagnosis, and treatment of rehabilitation patients. Written by a team of leading experts in the field, the book covers all aspects of rehabilitation medicine, from the initial evaluation to discharge planning.

The book is divided into three parts. Part I covers the assessment and diagnosis of rehabilitation patients. Part II discusses the principles of rehabilitation treatment. Part III presents specific treatment approaches for common rehabilitation diagnoses.

The Documentation for Rehabilitation book is an essential resource for all clinicians who work with rehabilitation patients. The book provides practical

guidance on how to assess, diagnose, and treat rehabilitation patients, and it is also an excellent resource for teaching and research.
