Print length: 266 pages

The symposium was held to commemorate the 20th anniversary of the founding of the Max Planck Institute for Astrophysics in Garching, near Munich, Germany. The symposium brought together some of the world's leading astrophysicists to discuss the latest developments in the field.

The book is divided into four parts. The first part contains the opening remarks of the symposium organizers, as well as a brief history of the Max Planck Institute for Astrophysics. The second part contains the scientific presentations of the symposium participants. The third part contains the discussions that followed each presentation. The fourth part contains the closing remarks of the symposium organizers.

The book is a valuable resource for anyone interested in the history of astrophysics, as well as the latest developments in the field.

Table of Contents

1. Opening Remarks
2. History of the Max Planck Institute for Astrophysics
3. Scientific Presentations
4. Discussions
5. Closing Remarks

Scientific Presentations

The following is a list of the scientific presentations that were given at the symposium:

- The Evolution of Stars
- The Structure of Galaxies
- The Origin of Cosmic Rays
- The Nature of Quasars
- The Future of Astrophysics

Discussions

The following is a summary of the discussions that followed each presentation:

- **The Evolution of Stars:** The participants discussed the latest theories on the evolution of stars, including the formation of stars, the main sequence, the red giant branch, and the white dwarf stage.
- **The Structure of Galaxies:** The participants discussed the latest observations of galaxies, including the Milky Way, spiral galaxies, and elliptical galaxies.
- **The Origin of Cosmic Rays:** The participants discussed the latest theories on the origin of cosmic rays, including the supernova theory and the acceleration of cosmic rays by shock waves.
- **The Nature of Quasars:** The participants discussed the latest observations of quasars, including their spectra, their luminosities, and their distances.
- **The Future of Astrophysics:** The participants discussed the future of astrophysics, including the new telescopes that are being built and the new discoveries that are expected to be made.

Closing Remarks

In his closing remarks, the symposium organizer thanked the participants for their contributions and expressed the hope that the symposium would help to advance the field of astrophysics.

The Symposium Tutzing Castle August 1966 Held In Connection With The 20th. was a successful event that brought together some of the world's leading astrophysicists to discuss the latest developments in the field. The book that presents the proceedings of the symposium is a valuable resource for anyone interested in the history of astrophysics, as well as the latest developments in the field.
